RE: NPDES Permit No. NH0090000 / Discharge No. 005A

In the month of June, the Pease Wastewater Facility had no violations.

Please note there was a correction to the Pease May DMR. The BOD monthly average was incorrectly reported as 2.8mg/L. Because the average was below the BOD detection limit of 5 mg/L, the reported result should have been 0.0 mg/L.

The CL2 detection limit is 0.05mg/L and the plant reports less than the detection limit using Standard Methods 4500-CL-G Page 4 - 63 (colorimetric). The BOD detection limit is 5 mg/L and the plant reports less than the detection limit using Standard Methods 5210-B.

Sincerely,

Terry L. Desmarais, P.E.
City Engineer
City of Portsmouth
